

INS-0204H

inSPRIT™ 4-CH H.264 Standalone DVR
Bring You the best video quality and performance

INS-0204H is a powerful 4 channels standalone DVR equipped with preload DVR software that runs on Linux operating system. This versatile unit combines the best Linux 2.6 kernel and H.264 codec technology and offers the total solution of power, stability and flexibility when applied to surveillance tasks on local and remote sites.

Unlike traditional time-lapse VCR system, this device integrates a quad processor, motion sensors, multiplexer, PTZ controls, time-lapse recorder, sensor inputs, alarm output, and network connection into one unit, it can playback of recorded video clips and remote access through internet while in recording mode simultaneously.

With 30FPS at full D1 resolution on all channels, backup to SD card or USB device, friendly OSD controlled by IR remote controller or front touch panel, it possesses a comprehensive list of features for mission critical surveillance applications.
